Perihal	Laporan Informasi atau Fakta Material Siaran Pers - Kiprah 40 Tahun Elnusa Berikan Solusi Total Jasa Energi di Blok Mahakam

Dengan ini kami untuk dan atas nama perusahaan menyampaikan Laporan Informasi atau Fakta Material sebagai berikut:

Nama Emiten atau Perusahaan Publik	Elnusa Tbk
Bidang Usaha	Jasa Energi
Telepon	(021) 788-30850
Faksimili	(021) 788-30883
Alamat Surat Elektronik (email)	corporate@elnusa.co.id

Tanggal Kejadian	28 Maret 2023
Jenis Informasi atau Fakta Material	Siaran Pers - Kiprah 40 Tahun Elnusa Berikan Solusi Total Jasa Energi di Blok Mahakam

Uraian Informasi atau Fakta Material	Jakarta, 28 Maret 2023 - Sejak sekitar 40 tahun lalu PT Elnusa Tbk (ELNUSA) telah berkiprah dalam mendukung kinerja operasi hulu migas di Wilayah Kerja (WK) Mahakam. Mulai dari era Total E&P Indonesie hingga kini dikelola PT Pertamina Hulu Mahakam (PHM), Elnusa tumbuh dan berkembang bersama blok gas raksasa di pesisir timur Kalimantan ini. Direktur Operasi Elnusa Charles Harianto Lumbantobing menceritakan kehadiran Elnusa di Blok Mahakam sudah sejak tahun 1980-an saat Total E&P Indonesie menjadi operator. Kala itu jasa Hydraulic Workover Unit (HWU) & Snubbing Services menjadi pelopor kiprah Elnusa di sana. Selanjutnya Elnusa membawa layanan Slickline Services pada dekade 90-an, jasa Well Testing (2008), Coiled Tubing Services (2011), Cementing & Pumping Services, Mud Services dan Mud Logging Services (2019), hingga Wireline Logging (2020). Elnusa juga melakukan inovasi bersama PHM untuk melakukan penghematan biaya operasional seperti modifikasi HWU agar bisa digunakan untuk drilling di 5 sumur lapangan Tunu, penggunaan wireline combo yang bisa memangkas biaya mobilisasi, penggunaan cemen slurry merah putih yang menghasilkan bonding cement yang bagus dan penggunaan sand consolidation product dalam negeri. Bahkan untuk kegiatan Seismic Processing dan EPC&OM Services juga sudah mulai digarap Elnusa di WK Mahakam. Keterlibatan anak usaha Elnusa di Mahakam juga cukup diperhitungkan, dari jasa kapal barge oleh PT Elnusa Trans Samudera (ETSA), injeksi chemical dari PT Elnusa Petrofin (EPN), hingga pekerjaan modifikasi konstruksi lewat PT Elnusa Fabrikasi Konstruksi (EFK). 'Untuk di WK Mahakam, saat ini layanan yang dikerjakan Elnusa sudah cukup komplit, dapat dikatakan 80 persen services yang ada di Elnusa sudah masuk ke sana. Jadi kami telah mewujudkan solusi total jasa energi di Mahakam seperti Visi Elnusa yang ingin menjadi Perusahaan Jasa Energi Terkemuka yang Memberikan Solusi Total,' paparnya. Charles mengungkapkan dukungan manajemen serta personel perusahaan menjadi kunci sukses sepak terjang positif Elnusa dalam kegiatan operasi migas di blok gas yang pada awal 2023 ini produksinya mencapai 632,5 juta standar kaki kubik gas per hari (MMscfd). Lalu kerja sama dengan pihak operator sejak dari Total E&P Indonesie hingga PHM pun selalu terjalin dengan baik. 'Kerja sama antara operator dengan Elnusa bisa dikatakan kerja sama partner atau mitra, di mana ada keterbukaan serta kerja bersama untuk maju bersama,' tutur Charles. Lebih lanjut Charles menerangkan, eksistensi Elnusa di Blok Mahakam memang berawal dari adanya kepercayaan yang diberikan pihak operator, di mana Elnusa kerap ditawarkan untuk mengerjakan pilot project sampai project besar. Contohnya pilot project untuk pemanfaatan HWU untuk kegiatan drilling, Elnusa telah mendapatkan kesempatan untuk mengerjakannya di Mahakam sejak era Total E&P Indonesie. Kesempatan serupa juga terjadi pada jasa Coiled Tubbing Services (2011) dan Cementing (2019), padahal sebelumnya untuk pekerjaan-pekerjaan tersebut didominasi oleh perusahaan services multinasional. 'Adanya kesempatan tersebut kian meningkatkan kapasitas dan kapabilitas Elnusa dari waktu ke waktu sehingga dapat menjadi bagian penting

dalam menyokong operasi migas di WK Mahakam,' jelas Charles.

Dia pun berharap Elnusa dapat terus tumbuh bersama dengan PHM di Blok Mahakam, sehingga kegiatan operasi hulu migasnya bisa berjalan optimal dan menghasilkan revenue yang baik dengan tetap mengutamakan aspek keselamatan kerja. 'Kami mengharapkan WK Mahakam tetap menjadi recurring income bagi Elnusa. Karena itu kami berupaya untuk tetap menjaga produksi di WK Mahakam tetap bagus, stabil, dan sesuai target, sehingga Elnusa dapat terus memberikan layanan jasa terbaiknya dan bahkan melakukan diversifikasi services di sana ke depannya,' bebernya.

Selain itu Charles juga mengharapkan agar kinerja positif Elnusa di Blok Mahakam dapat diimplementasikan pula di lapangan-lapangan migas lainnya di Indonesia. 'Solusi total jasa energi itu sudah dilakukan Elnusa di Blok Mahakam, semoga pencapaian ini juga bisa dibawa dan direplikasi ke tempat lain sehingga bisnis Elnusa bisa menjadi lebih besar lagi di masa depan,' pungkas Charles.

Chalid Said Salim, Direktur Utama PT Pertamina Hulu Indonesia (PHI) sebagai induk perusahaan yang membawahi PHM, menyampaikan apresiasi atas kemitraan dan kinerja Elnusa yang baik dalam mendukung keberhasilan kegiatan operasi hulu migas di WK Mahakam. 'Kami berkomitmen menjalankan operasi migas yang selamat, andal, patuh, dan ramah lingkungan dengan menerapkan praktik-praktik terbaik di industri hulu migas nasional dan global. Elnusa sudah menjawab kepercayaan yang diberikan oleh PHI dan PHM dengan kinerja dan kualitas layanan yang kian meningkat dari tahun ke tahun,' ucap Chalid.

Kinerja apik Elnusa tersebut terbukti dengan keberhasilan Elnusa yang selalu menjadi langganan meraih The Mahakam Award dari zaman Total E&P Indonesie hingga PHM kini. The Mahakam Award merupakan bentuk apresiasi tertinggi yang diberikan pihak operator di WK Mahakam kepada para kontraktor yang menunjang kegiatan operasi di Blok Mahakam. 'Kami berharap Elnusa terus dapat menjadi mitra yang dapat diandalkan sebagai bukti sinergi antar anak usaha Subholding Upstream Pertamina guna mendukung peningkatan produksi gas di WK Mahakam dan menjaga ketahanan energi nasional,' lanjut Chalid.

Sekilas Elnusa (IDX: ELSA)
Elnusa merupakan anak perusahaan PT Pertamina Hulu Energi (PHE) yang tegabung dalam Subholding Upstream Pertamina. Sebagai perusahaan solusi total jasa energy, Elnusa memiliki kompetensi inti pada jasa hulu migas, jasa penunjang dan jasa distribusi dan logistik energi. Lini jasa hulu migas meliputi jasa Geoscience & Reservoir (land, transition zone & marine serta data processing), jasa pengeboran & pemeliharaan lapangan migas (drilling & workover), jasa engineering, procurement, construction & operation maintenance (EPC-OM). Lini jasa penunjang meliputi jasa marine support, fabrikasi, hingga manajemen data. Lini jasa distribusi dan logistik energi meliputi jasa transportasi BBM, pengelolaan depot, hingga penjualan chemical. Saat ini, Elnusa melayani perusahaan migas nasional maupun internasional, antara lain Pertamina Group, British Petroleum, Conoco Phillips, Soco Exploration (Vietnam) Ltd dan lain-lain.

Elnusa terdaftar pada Bursa Efek Indonesia dengan kode emiten 'ELSA' serta memiliki lima anak perusahaan yang mendukung kompetensinya. Informasi lebih lanjut dapat diakses pada www.elnusa.co.id.

Dampak kejadian, informasi atau fakta material tersebut terhadap kegiatan operasional, hukum, kondisi keuangan, atau kelangsungan usaha Emiten atau Perusahaan Publik	Tidak ada

Demikian untuk diketahui.

Date of Event	28 March 2023
Type of Material Information or Facts	Press Release - Elnusa's 40 Year Gait Provides Total Solutions for Energy Services in the Mahakam Block

Description of Material Information or Facts	Jakarta, 28 March 2023 - Since about 40 years ago PT Elnusa Tbk (ELNUSA) has been taking part in supporting the performance of upstream oil and gas operations in the Mahakam Working Area (WK). Starting from the era of Total E&P Indonesie until now it is managed by PT Pertamina Hulu Mahakam (PHM), Elnusa has grown and developed together with this giant gas block on the east coast of Kalimantan. Elnusa Director of Operations Charles Harianto Lumbantobing said that Elnusa's presence in the Mahakam Block had been since the 1980s when Total E&P Indonesie became the operator. At that time the Hydraulic Workover Unit (HWU) & Snubbing Services became the pioneers of Elnusa's work there. Furthermore, Elnusa brought Slickline Services in the decade of the 90s, Well Testing services (2008), Coiled Tubing Services (2011), Cementing & Pumping Services, Mud Services and Mud Logging Services (2019), to Wireline Logging (2020). Elnusa also innovated with PHM to save operational costs such as modifying HWU so that it could be used for drilling 5 wells in the Tunu field, using a wireline combo which could cut mobilization costs, using red and white cement slurry which produced good bonding cement and using sand consolidation products domestic. In fact, Elnusa has also started working on Seismic Processing and EPC & OM Services activities at the Mahakam WK. The involvement of Elnusa's subsidiary in Mahakam is also quite taken into account, from barge services by PT Elnusa Trans Samudera (ETSA), chemical injection from PT Elnusa Petrofin (EPN), to construction modification work through PT Elnusa Construction Fabrication (EFK). 'For the Mahakam WK, currently the services carried out by Elnusa are quite complete, it can be said that 80 percent of the services at Elnusa have entered there. So we have realized a total energy service solution in Mahakam like Elnusa's Vision which wants to become a Leading Energy Services Company that Provides Total Solutions,' he explained. Charles said management support and company personnel were the key to Elnusa's positive progress in oil and gas operations in the gas block, which in early 2023 produced 632.5 million standard cubic feet of gas per day (MMscfd). Then the cooperation with operators from Total E&P Indonesie to PHM has always been well established. 'Collaboration between operators and Elnusa can be said to be partner or partner cooperation, where there is openness and joint work to move forward together,' said Charles. Charles further explained, Elnusa's existence in the Mahakam Block really started from the trust given by the operator, where Elnusa was often offered to work on pilot projects to big projects. For example, a pilot project for the use of HWU for drilling activities, Elnusa has had the opportunity to work on it in Mahakam since the Total E&P Indonesie era. Similar opportunities also occur in Coiled Tubbing Services (2011) and Cementing (2019), whereas previously these jobs were dominated by multinational service companies. 'This opportunity has further increased Elnusa's capacity and capability from time to time so that it can become an important part of supporting oil and gas operations at the Mahakam WK,' explained Charles.

He also hopes that Elnusa can continue to grow together with PHM in the Mahakam Block, so that its upstream oil and gas operations can run optimally and generate good revenue while still prioritizing work safety aspects. 'We hope that the Mahakam WK will continue to be a recurring income for Elnusa. Because of that, we are trying to keep production at the Mahakam WK good, stable and on target, so that Elnusa can continue to provide its best services and even diversify services there in the future,' he explained.

He also hopes that Elnusa can continue to grow together with PHM in the Mahakam Block, so that its upstream oil and gas operations can run optimally and generate good revenue while still prioritizing work
safety aspects. 'We hope that the Mahakam WK will continue to be a recurring income for Elnusa. Because of that, we are trying to keep production at the Mahakam WK good, stable and on target, so that Elnusa can continue to provide its best services and even diversify services there in the future,' he explained.

Chalid Said Salim, Main Director of PT Pertamina Hulu Indonesia (PHI) as the holding company in charge of PHM, expressed his appreciation for Elnusa's good partnership and performance in supporting the success of upstream oil and gas operations at the Mahakam WK. 'We are committed to running oil and gas operations that are safe, reliable, compliant and environmentally friendly by implementing the best practices in the national and global upstream oil and gas industry. Elnusa has answered the trust placed by PHI and PHM with performance and service quality that has been increasing from year to year,' said Chalid.

Elnusa's slick performance is proven by the success of Elnusa, which has always been a subscriber to win The Mahakam Award from the Total E&P Indonesie era to the present PHM. The Mahakam Award is the highest form of appreciation given by operators at the Mahakam WK to contractors who support operational activities in the Mahakam Block. 'We hope that Elnusa will continue to be a reliable partner as
proof of the synergy between Pertamina's Subholding Upstream subsidiaries to support increased gas production at the Mahakam WK and maintain national energy security,' continued Chalid

About Elnusa (IDX: ELSA)
Elnusa is a subsidiary of PT Pertamina Hulu Energi (PHE) which incorporated in Subholding Upstream Pertamina. As a total energy services solution company, Elnusa has core competencies in upstream oil and gas services, supporting services and energy distribution and logistics services. The upstream oil and gas service line includes Geoscience & Reservoir services (land, transition zone & marine and data processing), oil and gas field drilling & maintenance services (drilling & workover), engineering, procurement, construction & operation maintenance (EPC-OM) services. Supporting service lines include marine support services, fabrication, to data management. The energy distribution and logistics service line includes fuel transportation services, depot management, and chemical sales. Currently, Elnusa serves national and international oil and gas companies, including Pertamina Group, British Petroleum, Conoco Phillips, Soco Exploration

	(Vietnam) Ltd etc. Elnusa is listed on the Indonesia Stock Exchange with the issuer code 'ELSA' and has five subsidiaries that support its competence. More information can be accesse at www.elnusa.co.id.
